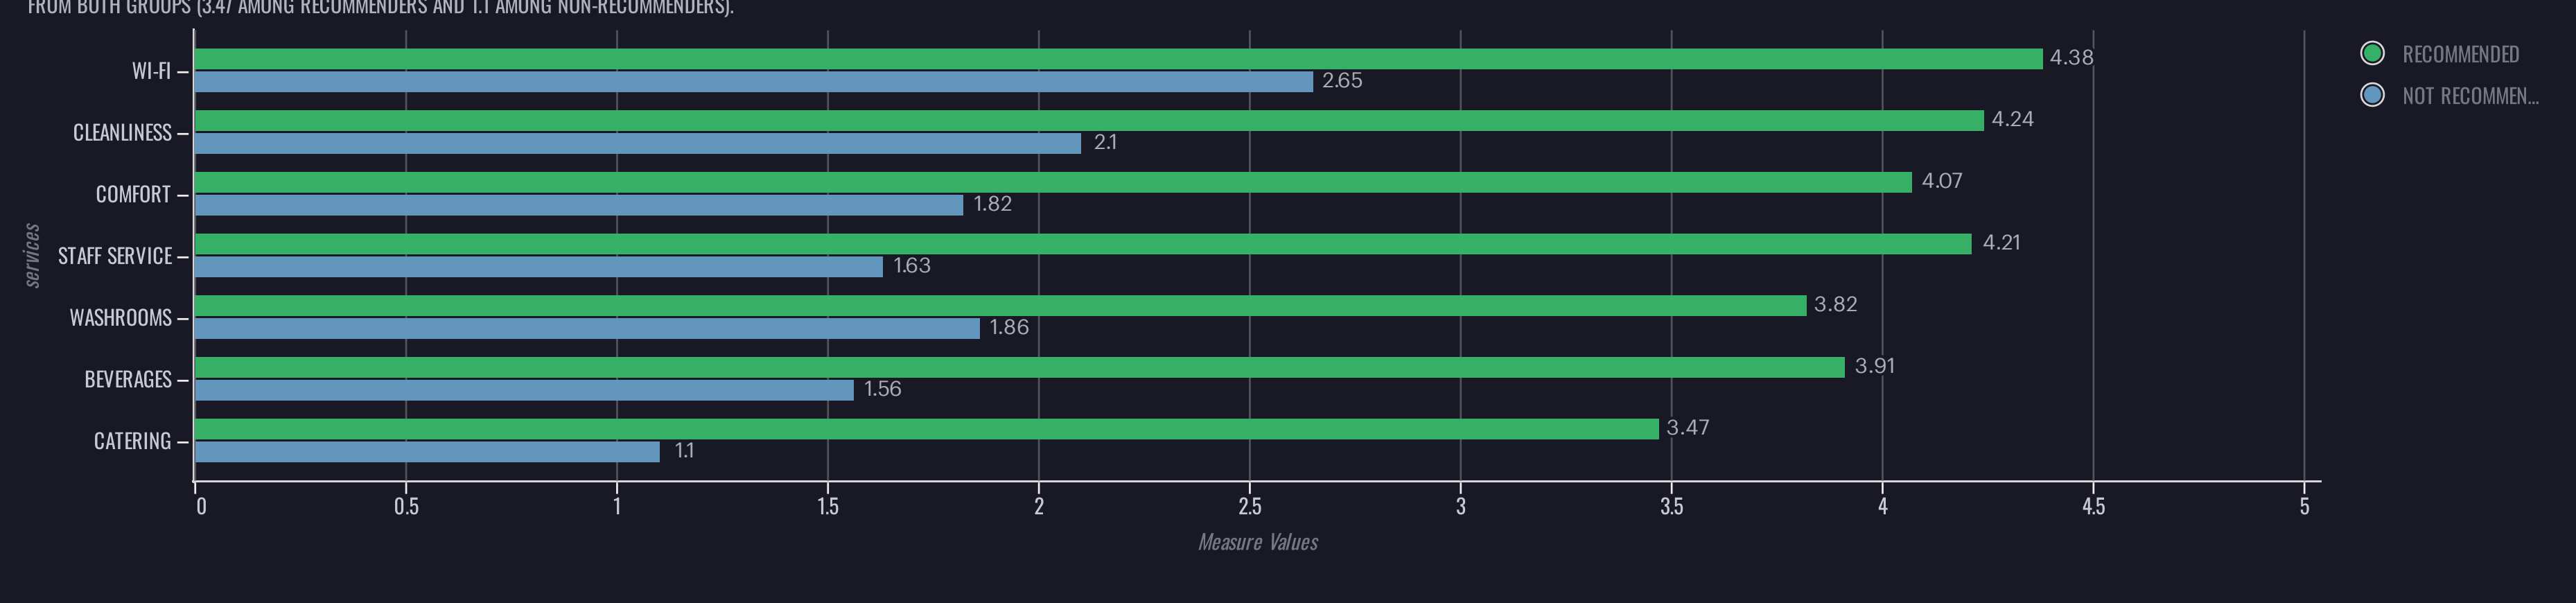
RECOMMENDATION GAP

STAFF SERVICE SHOWS THE LARGEST RECOMMENDATION GAP, SUGGESTING THAT STAFF INTERACTIONS ARE A PARTICULARLY STRONG DIFFERENTIATOR BETWEEN POSITIVE AND NEGATIVE CUSTOMER EXPERIENCES. MEANWHILE, CATERING EMERGES AS A KEY IMPROVEMENT OPPORTUNITY, RECEIVING THE LOWEST RATINGS FROM BOTH GROUPS (3.47 AMONG RECOMMENDERS AND 1.1 AMONG NON-RECOMMENDERS).



SERVICE SATISFACTION VS. RECOMMENDATION RATE OVER TIME

BOTH SERVICE RATING AND RECOMMENDATION RATING INCREASES OVER YEARS. YEARS WITH HIGHER SERVICE SATISFACTION GENERALLY ALSO HAVE HIGHER RECOMMENDATION RATES, SUGGESTING THAT SERVICE QUALITY IS AN IMPORTANT INDICATOR OF CUSTOMER WILLINGNESS TO RECOMMEND.

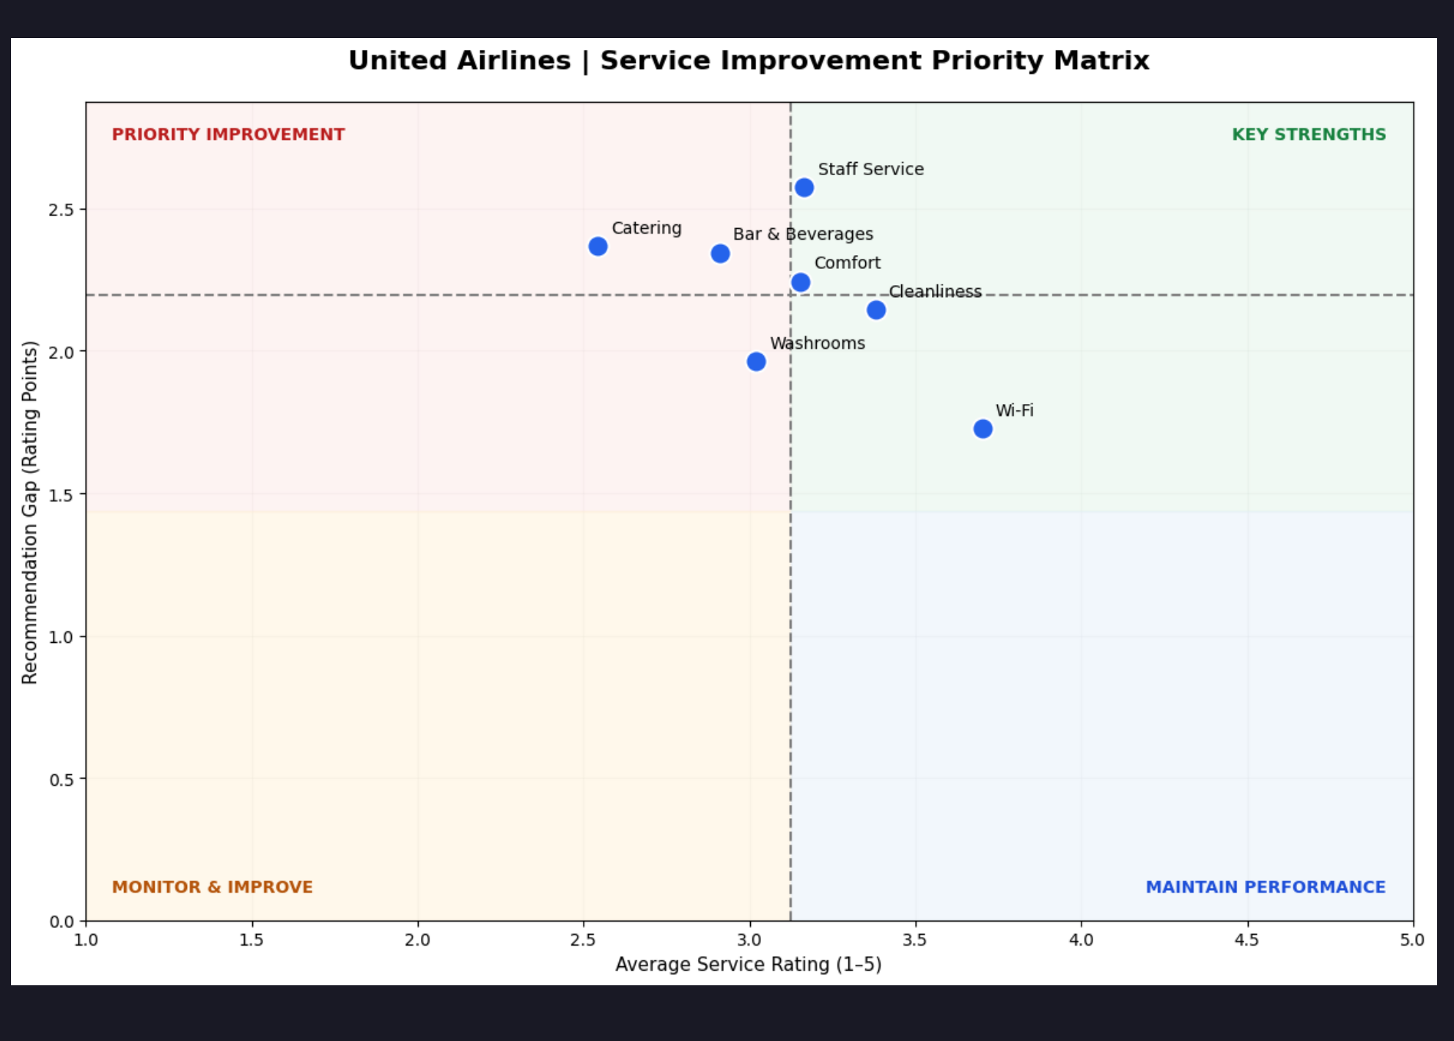
SERVICE IMPROVEMENT PRIORITY MATRIX



This Service Improvement Priority Matrix evaluates seven United Airlines lounge service categories from 2015 to 2025 using two metrics: **Average Service Rating** (X-axis), calculated as the mean customer rating for each service on a 1–5 scale, and **Recommendation Gap** (Y-axis), calculated as the difference in average service ratings between customers who recommended the lounge and those who did not.
Catering and Bar & Beverages fall into the Priority Improvement quadrant, reflecting below-average service ratings and above-average recommendation gaps. **Staff Service** has the largest recommendation gap, highlighting a strong association with customers' recommendation decisions. Meanwhile, **Wi-Fi** achieves the highest average rating and a relatively small recommendation gap, placing it in the Maintain Performance quadrant.
Action Takeaway: Prioritize improvements in Catering and Bar & Beverages, investigate inconsistencies in Staff Service, and maintain strong Wi-Fi performance to support overall customer satisfaction.
